

Deciding to Evaluate During Project Design

OUs can utilize this Flowchart to understand the evaluation requirements in ADS 201. For missions, all three evaluation requirements must be met during the duration of the mission's CDCS. Washington OUs that manage program funds and design and implement projects as described in ADS 201.3.3 must conduct one evaluation per project. All OUs can go through this decision tree for each project, and revisit this chart as many times as necessary until all requirements have been met across the portfolios. Missions and Washington OUs can always conduct non-required evaluations at any time. To help decide whether to conduct a non-required evaluation, please see "Planning an Evaluation" (Section 3 of the Evaluation Toolkit). For further guidance on how the ADS 201 evaluation requirements apply to you, contact your Program Office.

+Missions and Washington OUs (that manage program funds and design and implement projects) must meet this requirement.

*Only Applicable to Missions
