Measuring Systems Change

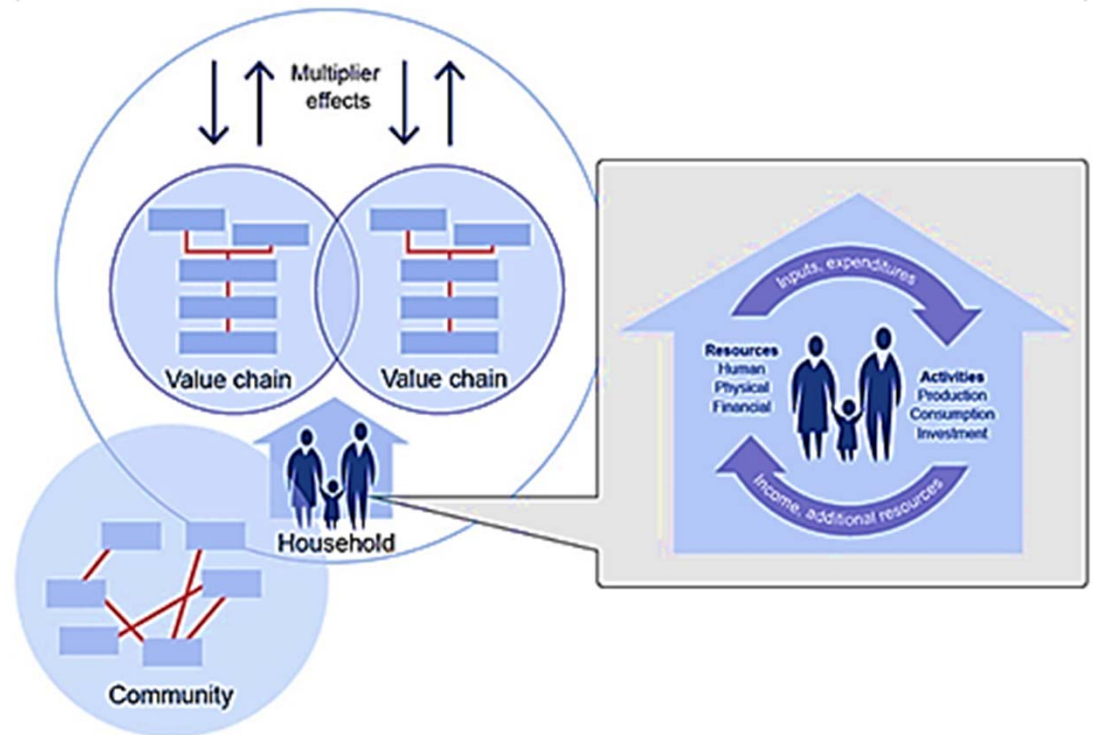

Partner Approaches

August 27, 2015

Leveraging Economic Opportunities (LEO)

- Supports USAID programming in market system facilitation (MSF)
- Emphasis on
 - Systems
 - Inclusion

Figure 1: Market system and interrelated household system

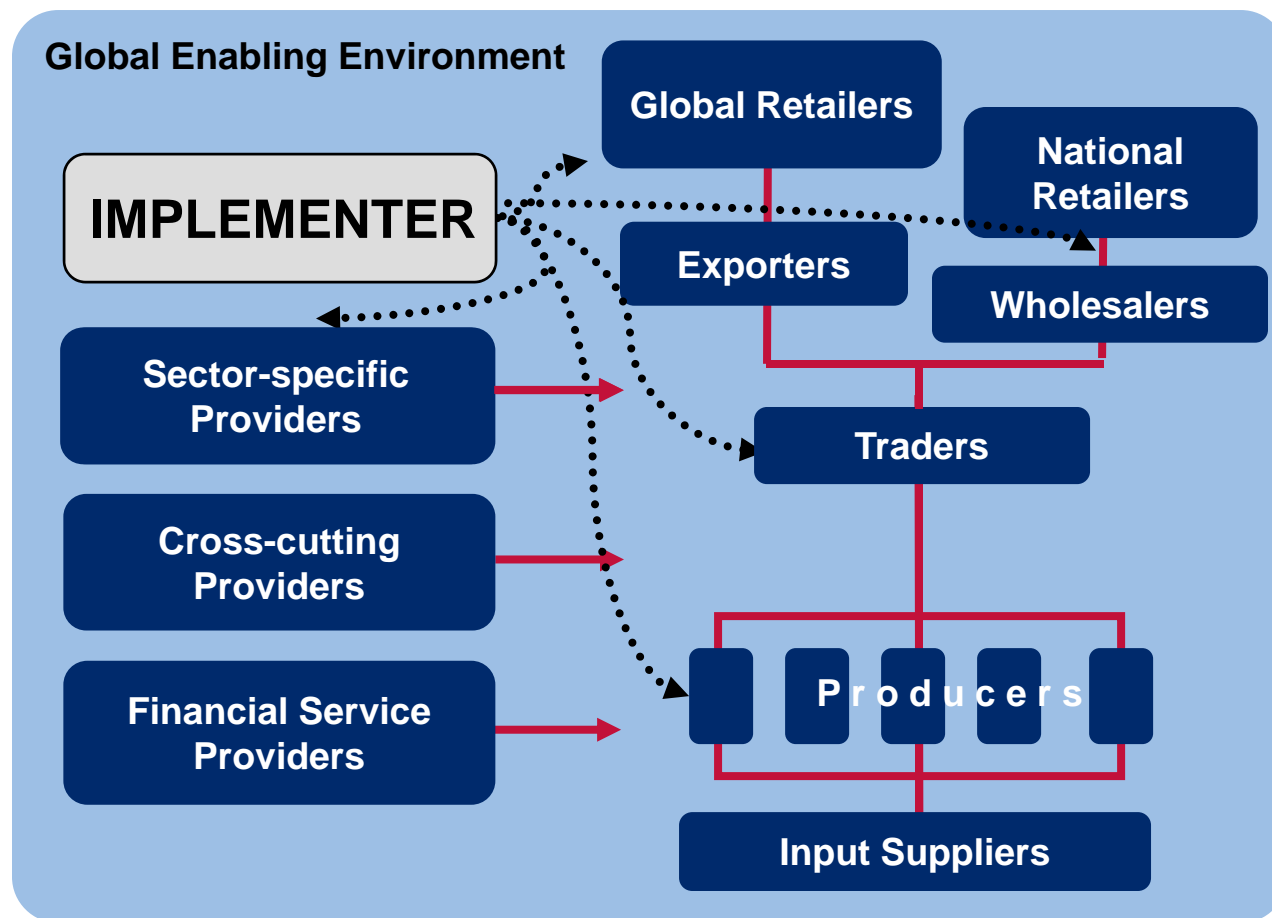

LEO M&E Agenda

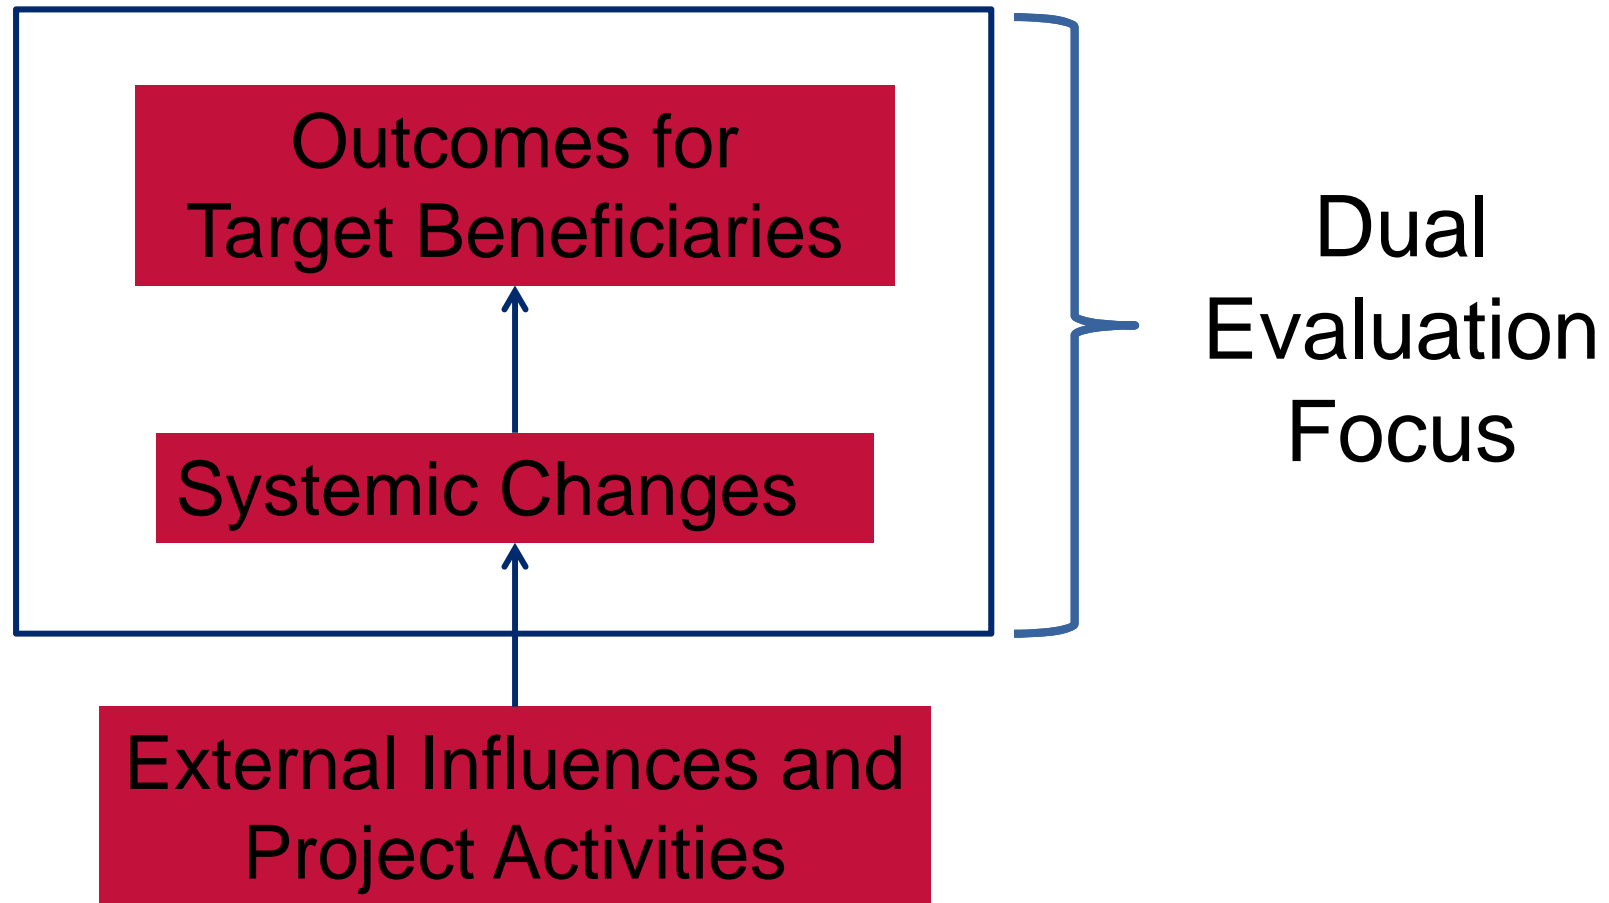

- Evaluation framework
- Evidence on scale
- Systemic change & early change

Market System Facilitation (MSF)

- Stimulates changes in market system without taking direct role in system

Evaluating MSF Programs

Developing Methods & Tools List

Shortlisted Methods & Tools

1. Capturing Indicators with Standard Measurement Tools
2. Most Significant Change
3. Outcome Harvesting
4. Outcome Mapping
5. SenseMaker®
6. Social Network Analysis
7. Participatory Systemic Inquiry (PSI)

SOCIAL PHYSICS

New Answers to the Systems and Capacity
Measurement Challenge

For Today

- Look back at our CD practices
- Introduce social physics
- Demonstrate how social physics can support ongoing work in capacity development, social marketing, behavior change and measurement

The Evolution in Our Capacity Development Approach

**Individual
Org**

**Network-Centered
Org**

**Mission-Centered
Org**

1.0 Capacities

Internal management
policies and procedures

2.0 Capacities

Relationship brokering and
networking to build social capital

Social Physics

A new way of understanding social change based on **idea flow**. We do this by analyzing relationship data, leveraging network analysis mathematical equations and gathering information about people and their behaviors.

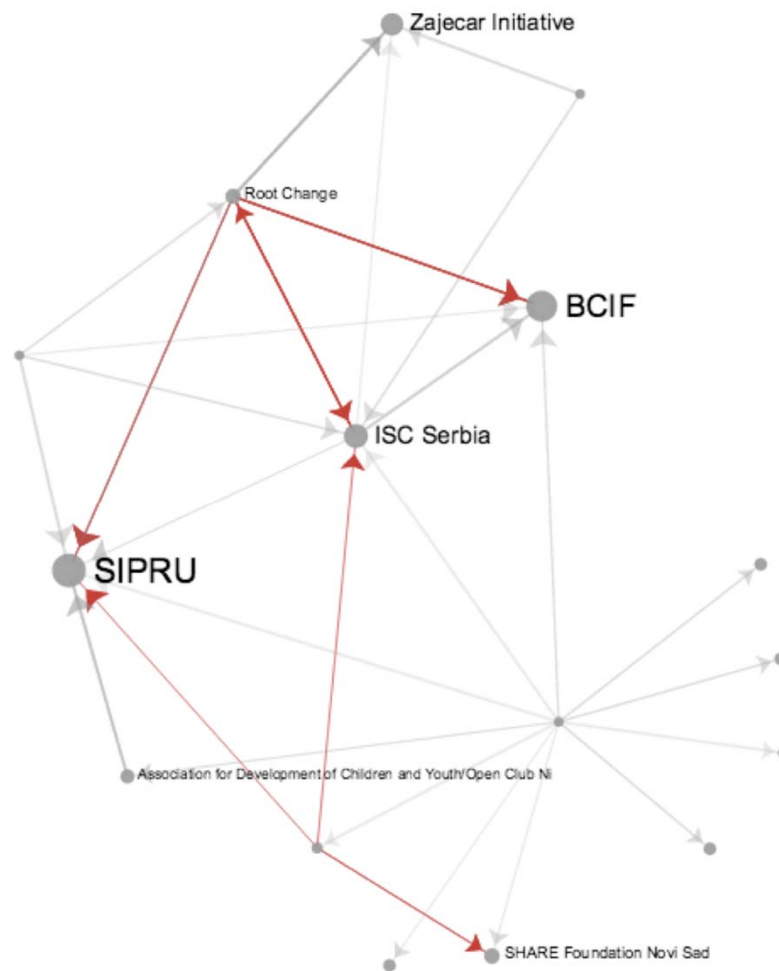

Network Analysis

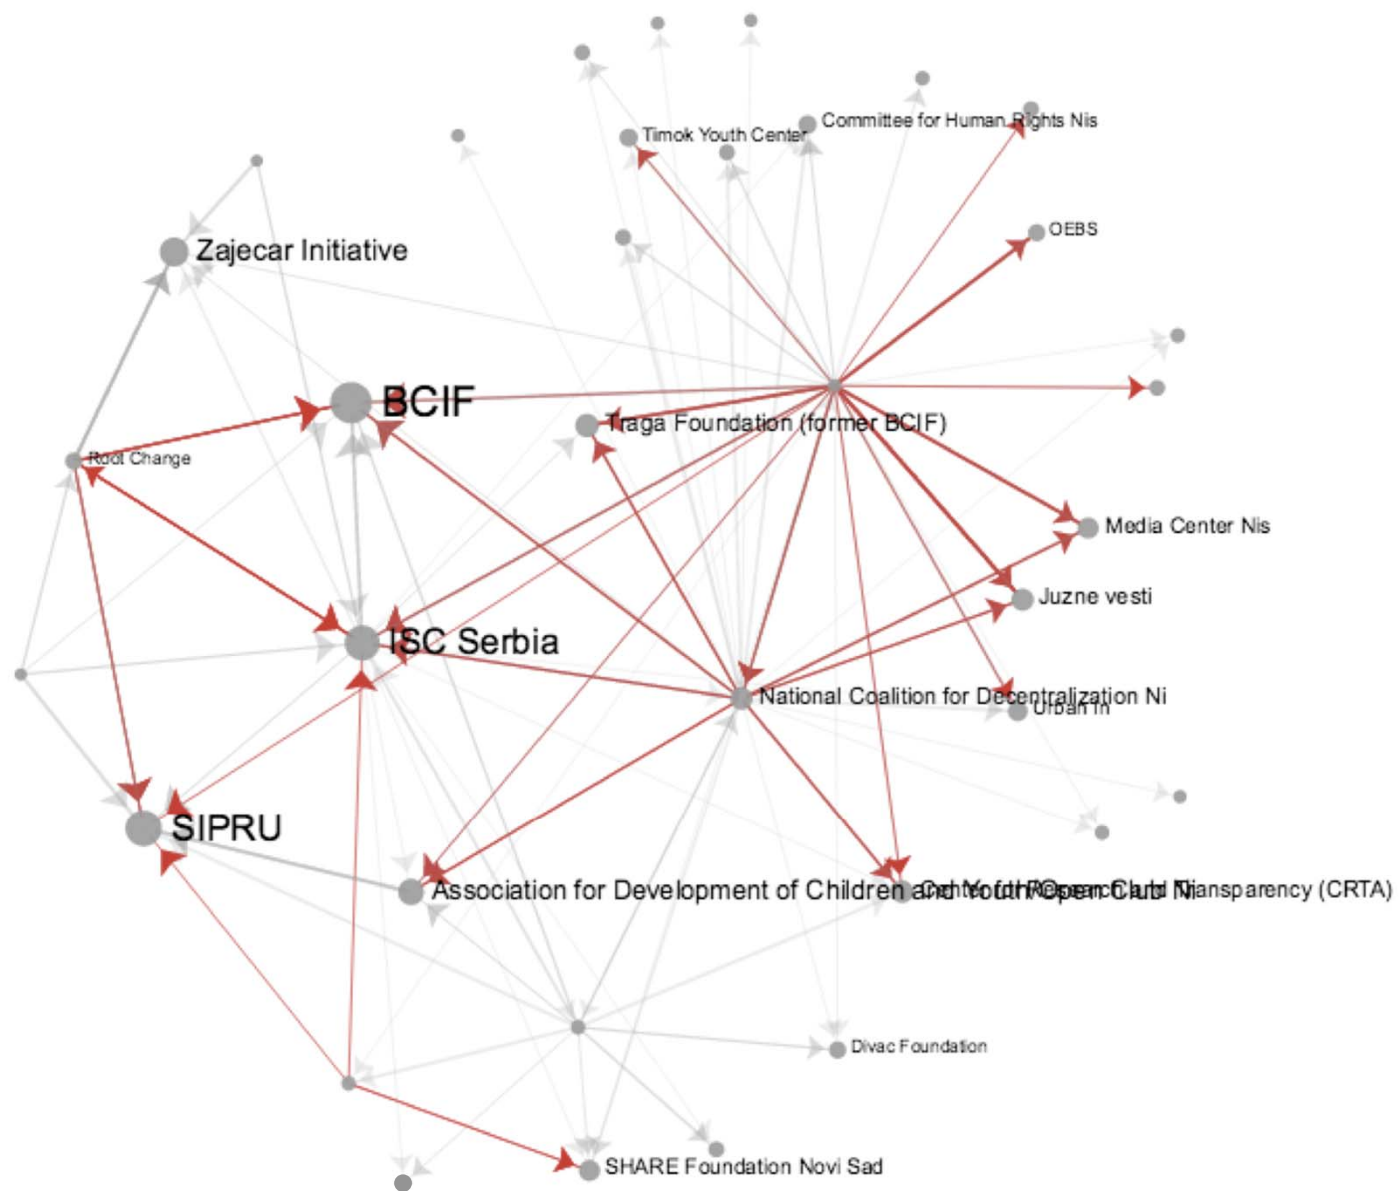

- Online platform to collect and visualize network data
- Short surveys to capture data on repeated cooperative interactions
- Software to analyze the network structure and identify key actors

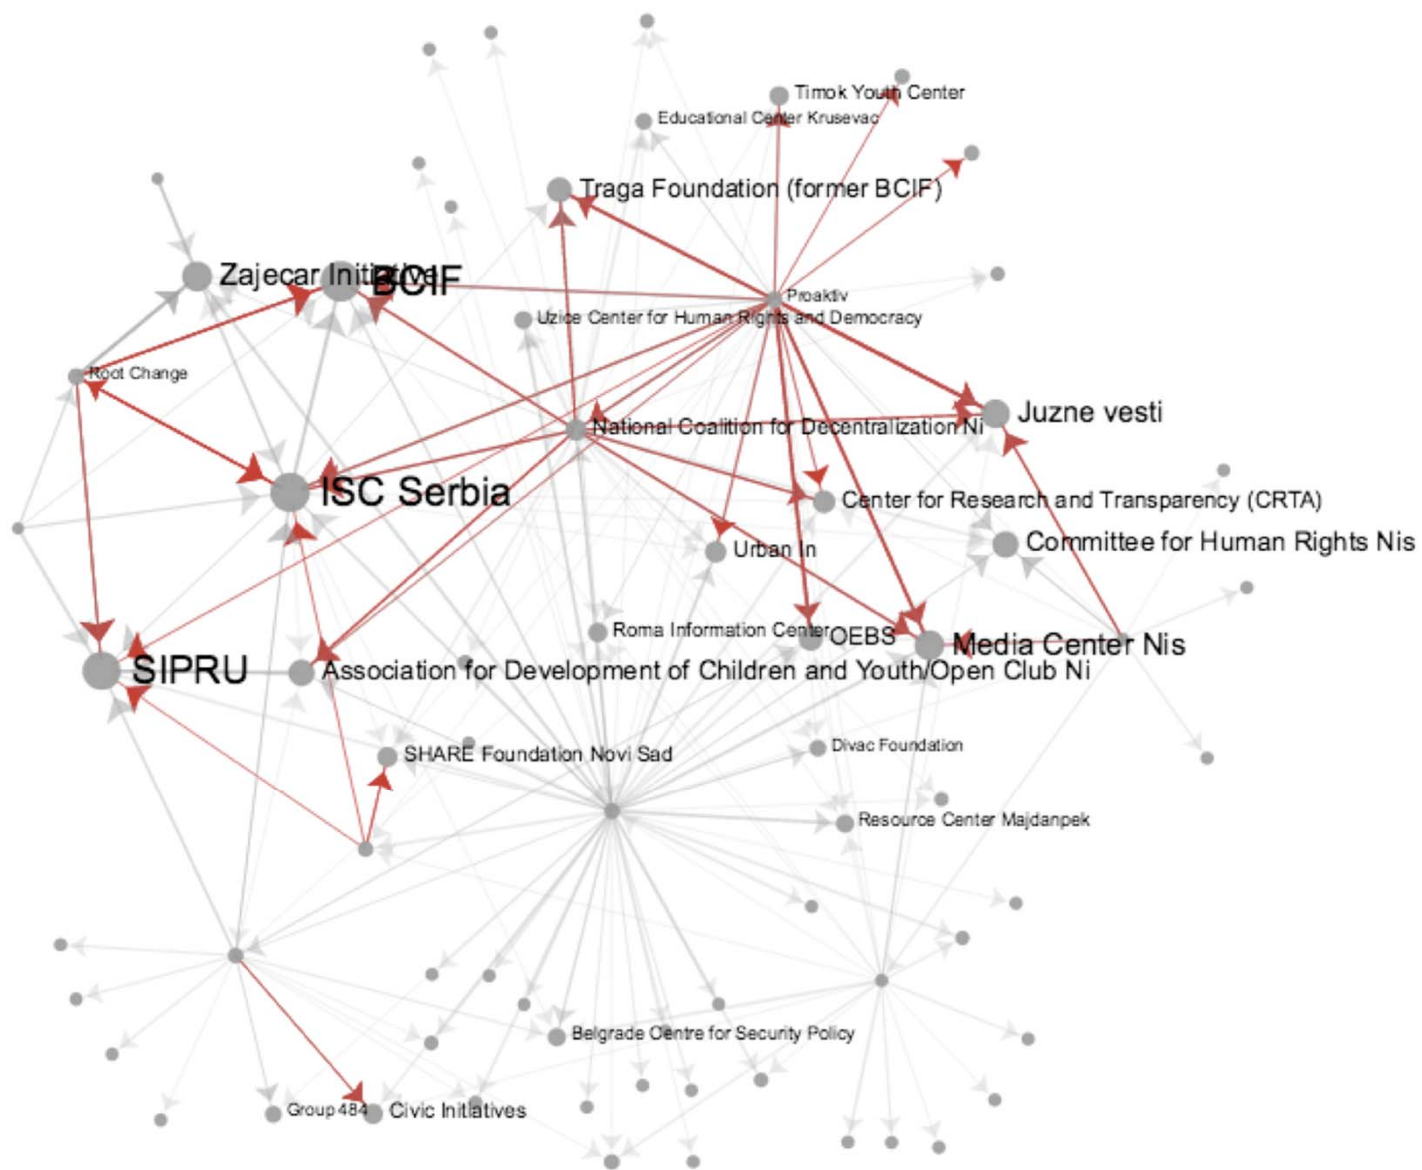

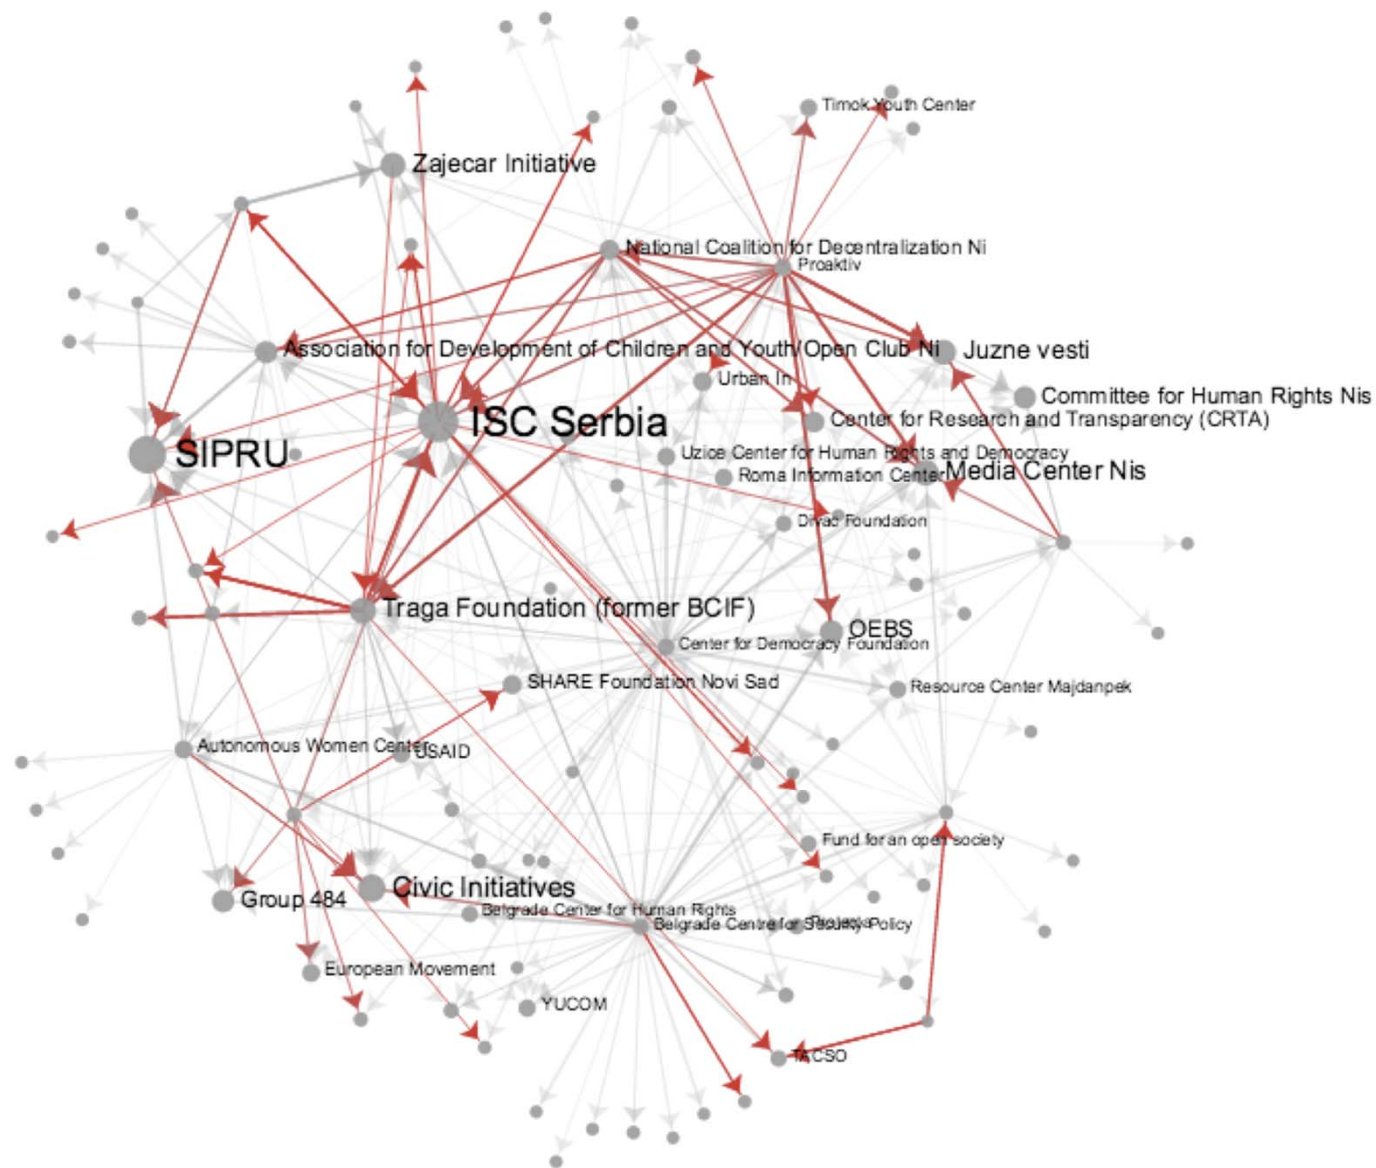

- *Who do you go to for the latest research and policy analysis?*
- *Who do you go to for support and advice to help you achieve your advocacy goals?*

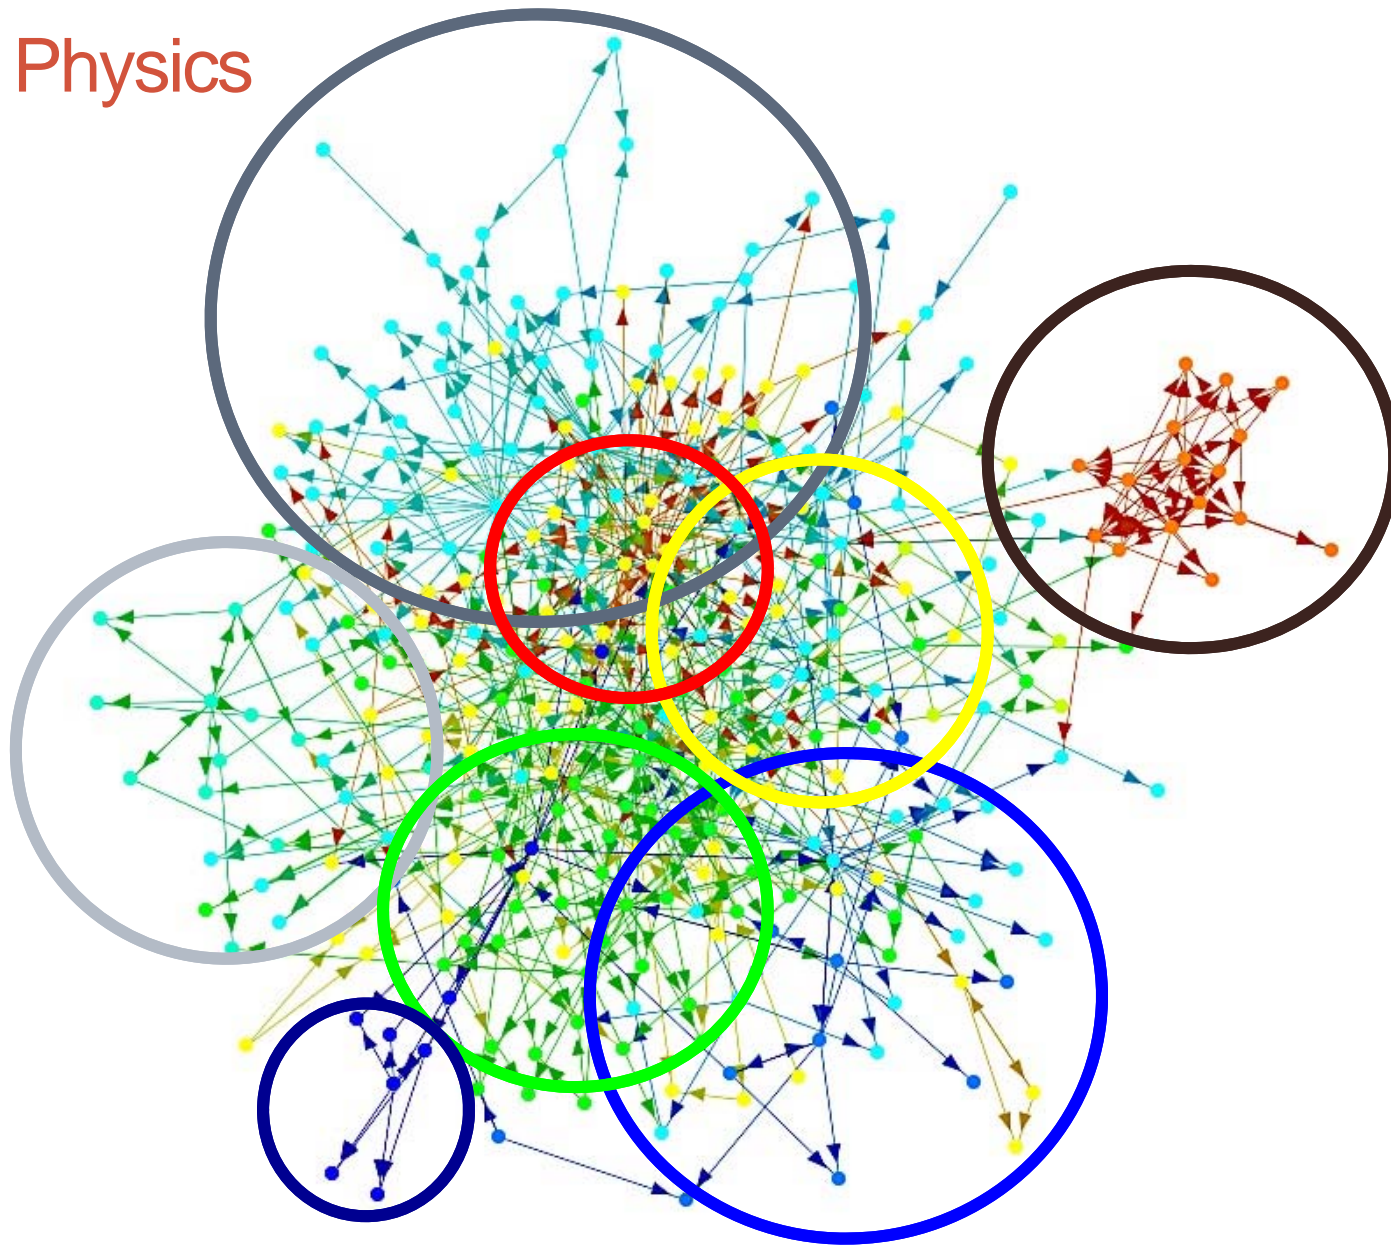

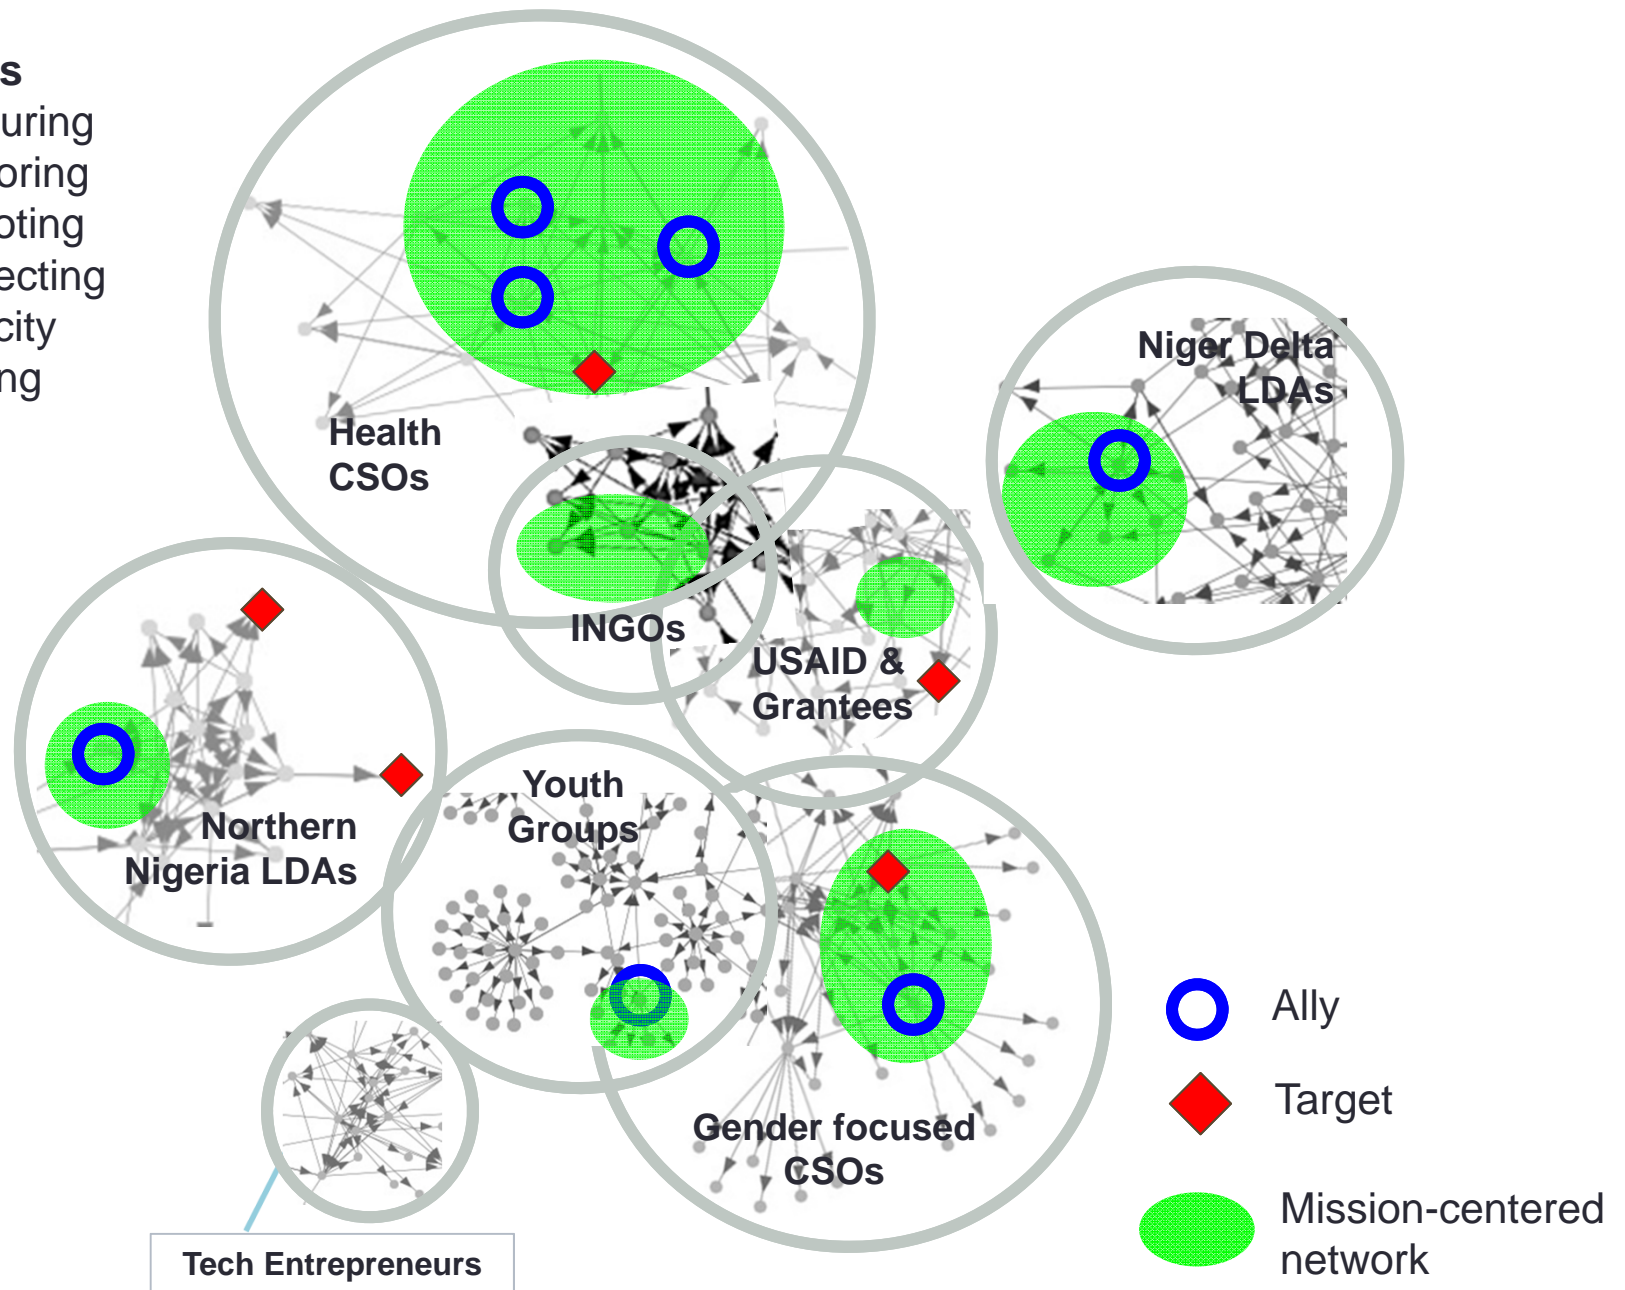

Social Physics

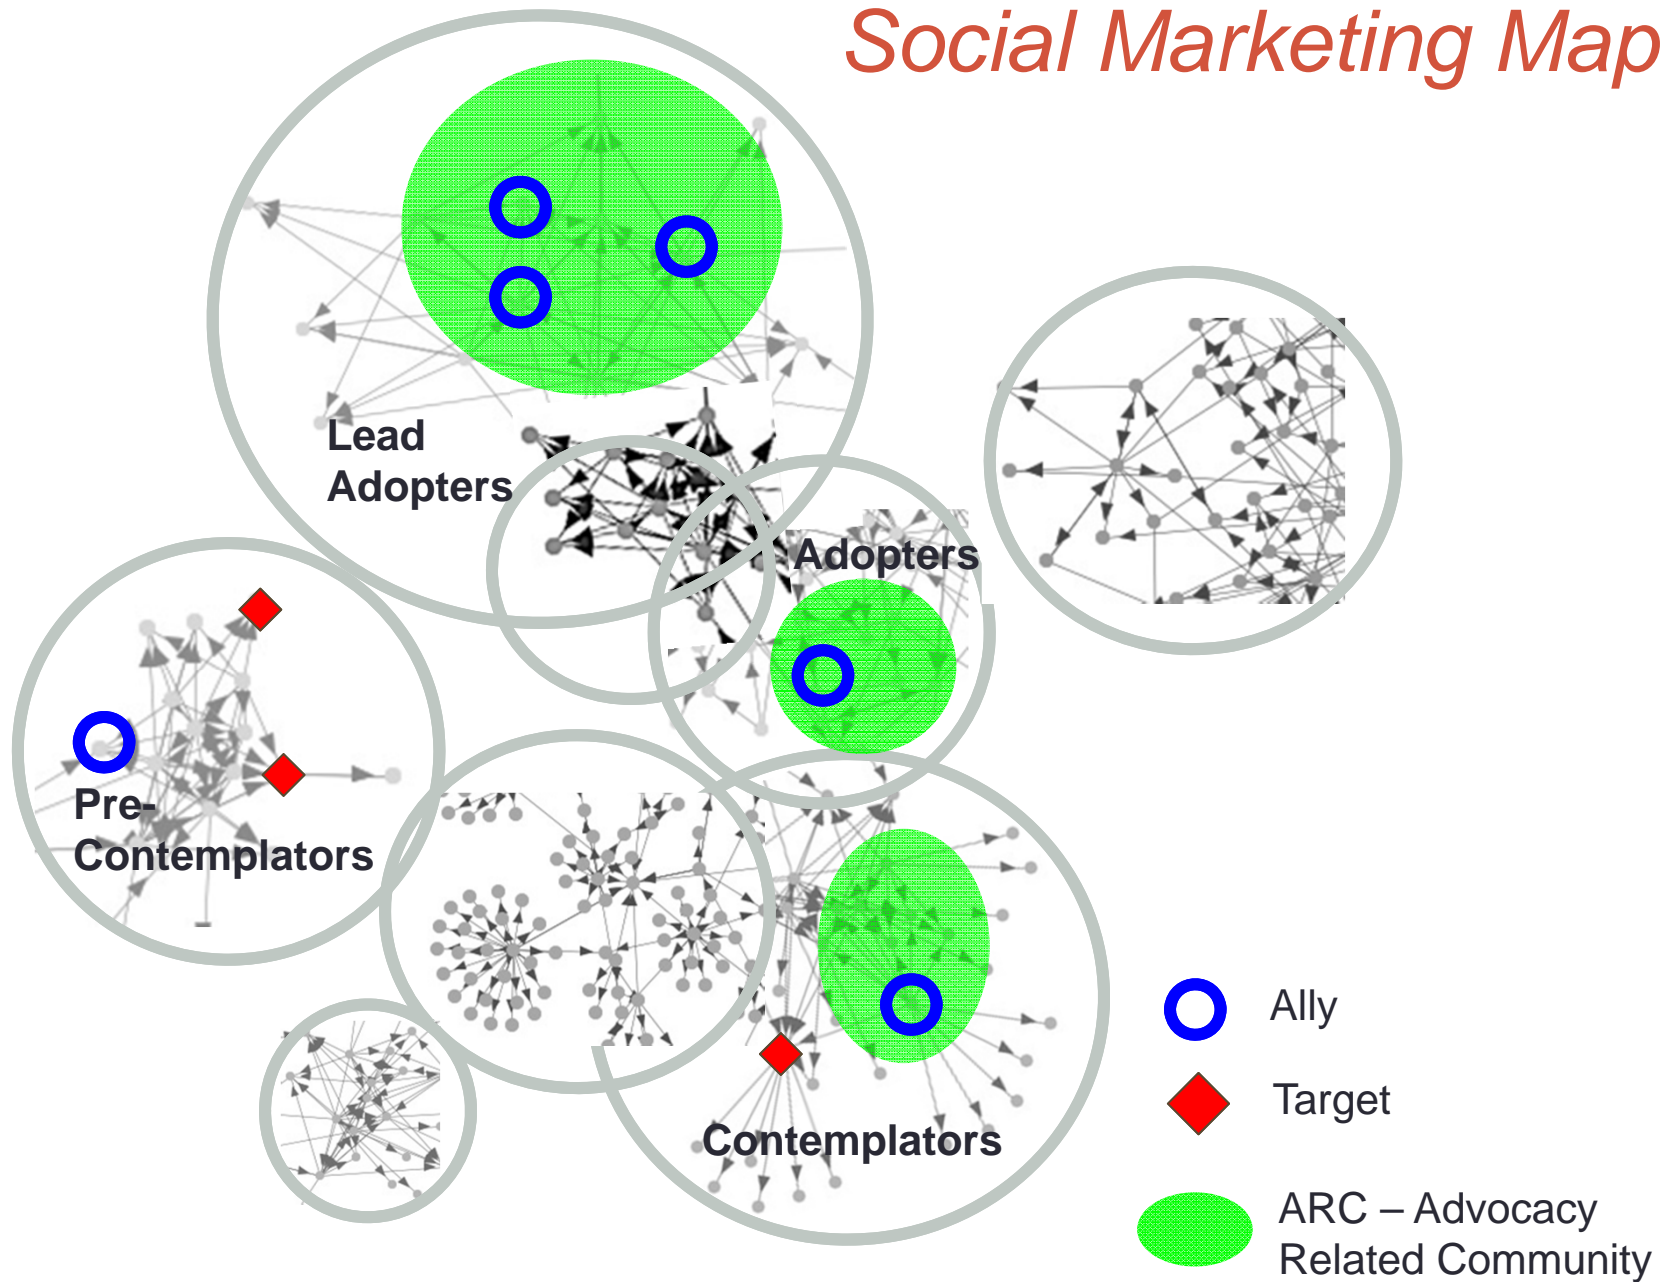

5 Benefits

1. Pressuring
2. Monitoring
3. Promoting
4. Connecting
5. Capacity Building

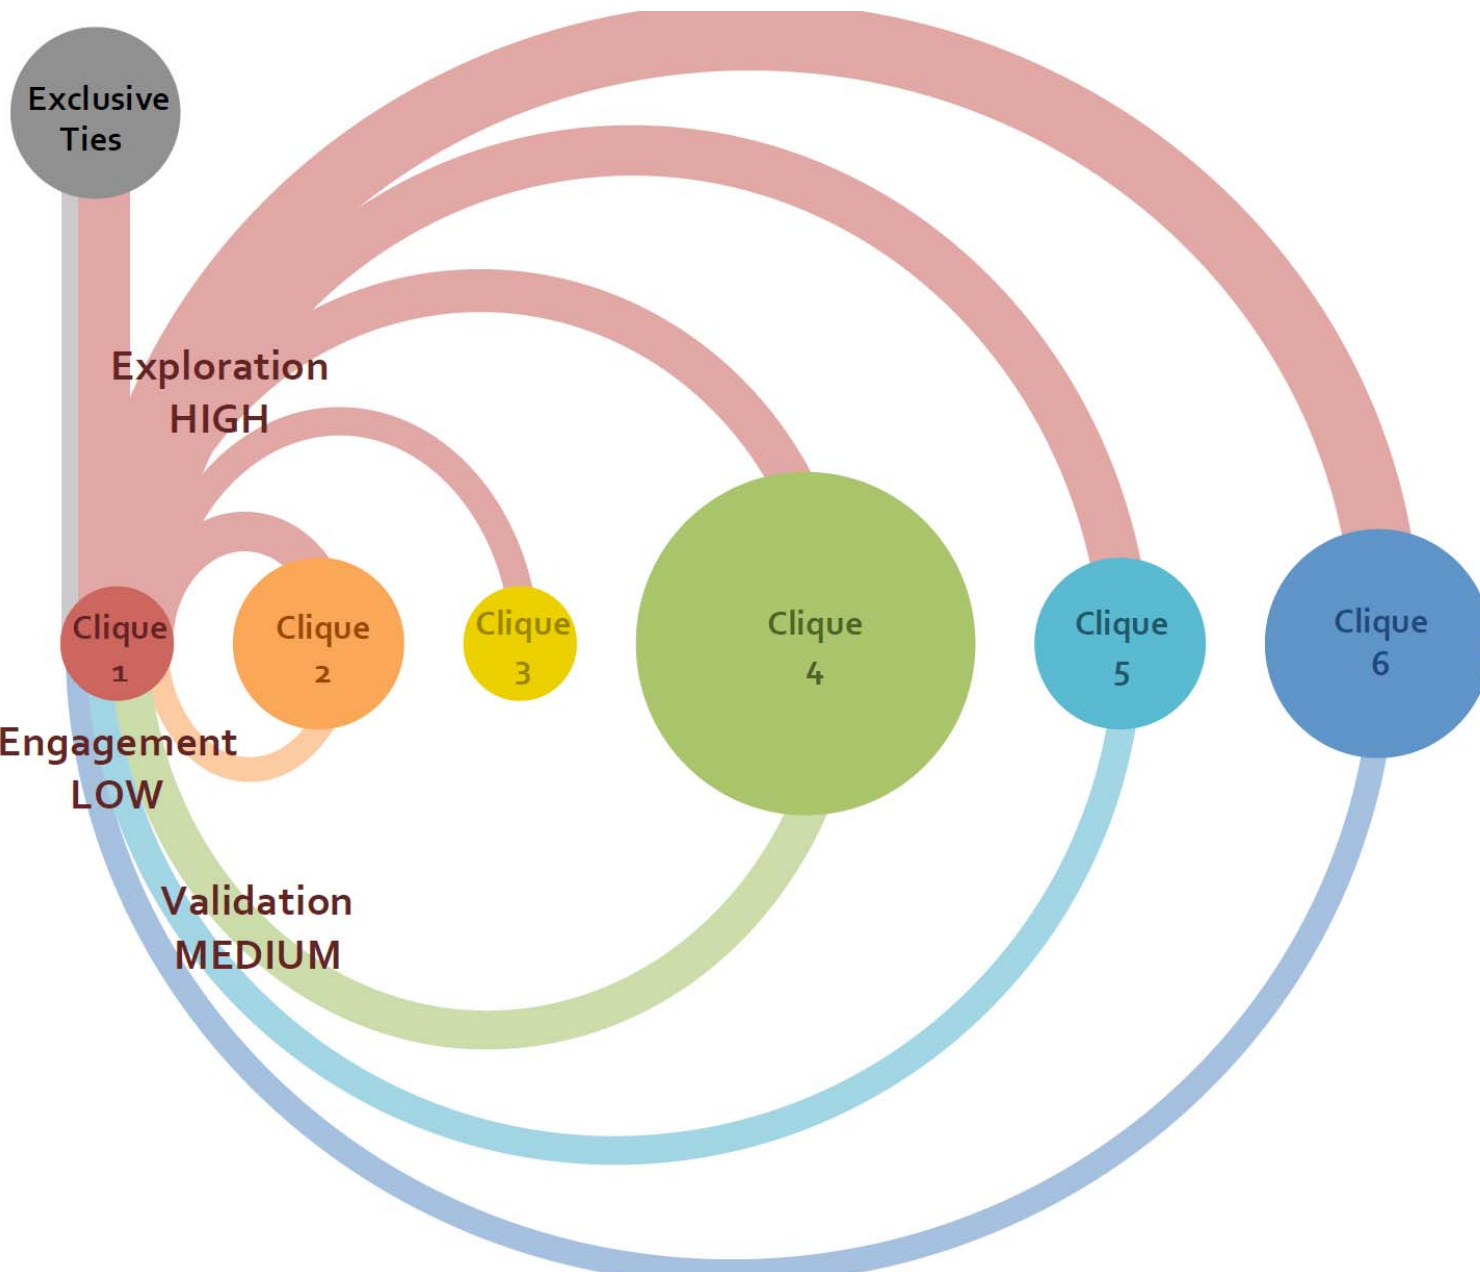

Social Marketing Map

Network Improvement

SOCIAL PHYSICS

New Answers to the Systems and Capacity
Measurement Challenge

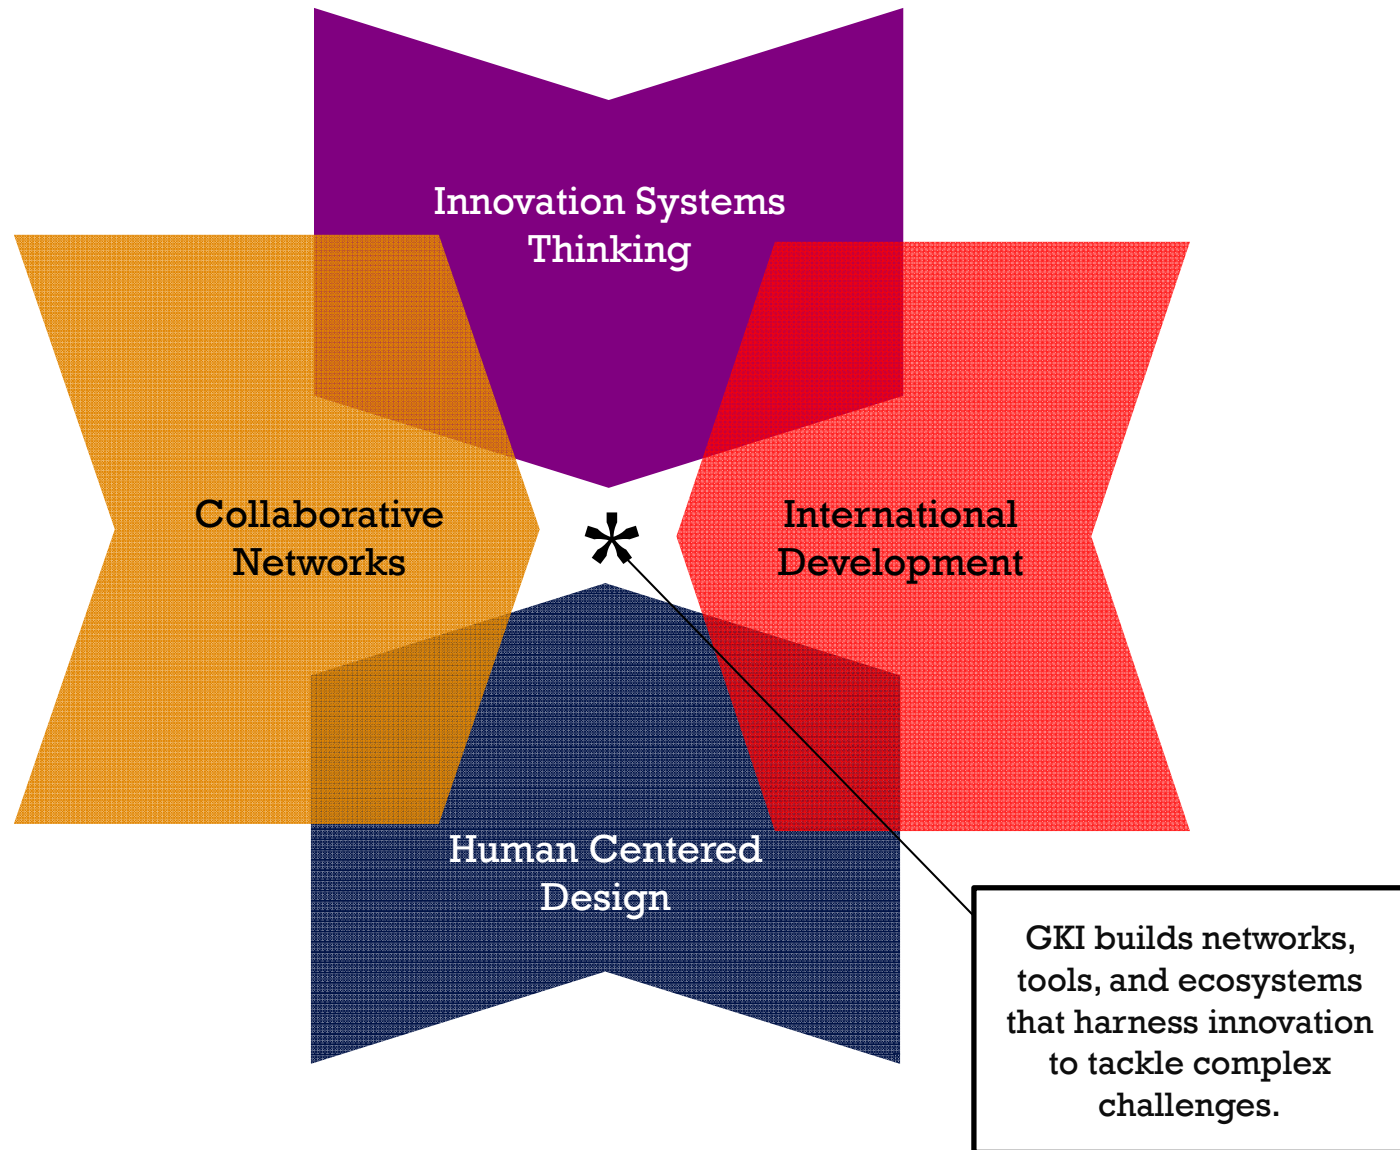

An Introduction to GKI's Suite of Systems Assessment & Monitoring Tools

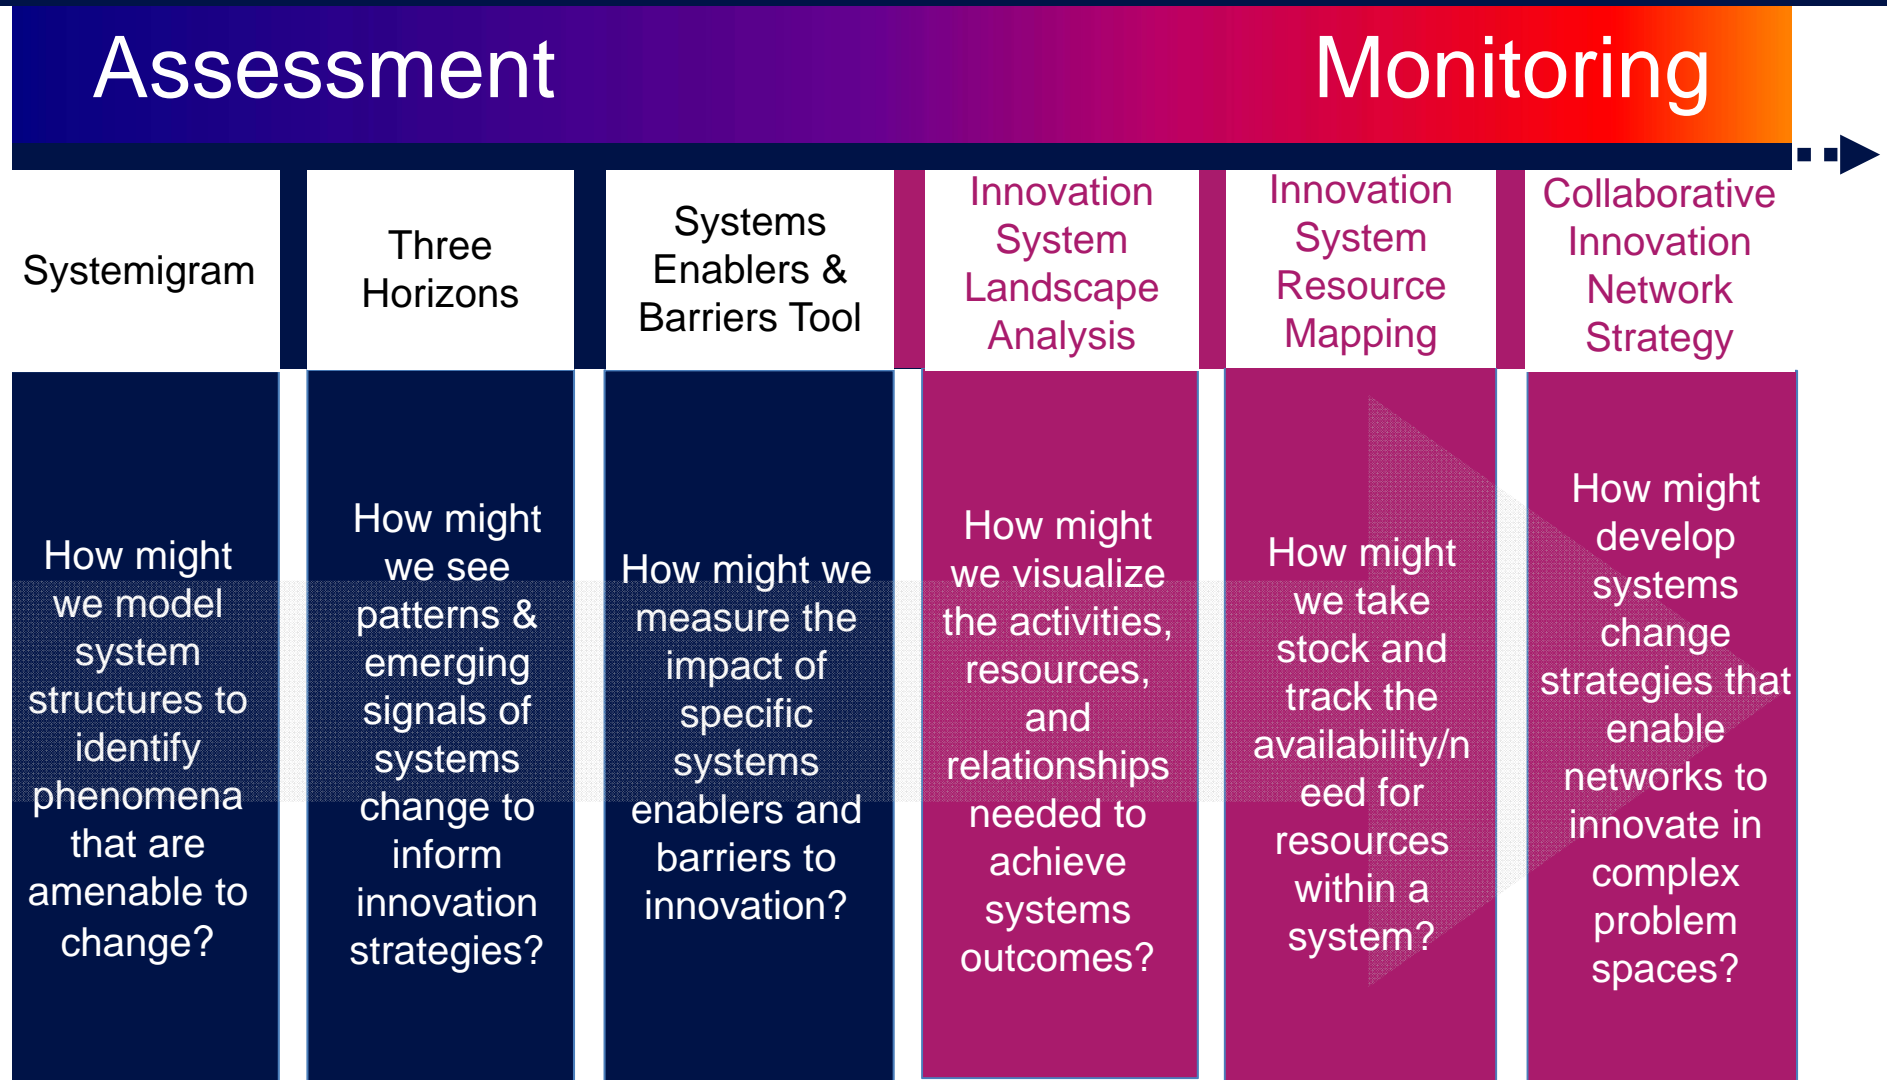

Presenter: Michael Sayre
GKI Sr. Program Officer, Innovation & Design

The Global Knowledge Initiative's Approach

GKI's Spectrum of Systems Analysis Tools

Systems Enablers & Barriers Analysis

What factors most significantly enable or thwart the ability of stakeholders to innovate within a system on a specific problem?

Inputs

- Innovation System Context Analysis *
- Innovation System stakeholder perspectives
- Influence and Incentives Scoring Matrix for Systems Analysis *
- Primary and Secondary source data

Insights

- Organized & ranked set of systems features that enable or constrain systems change
- Visual representation of systems change between present and future
- Key indicators of what systems change matters most for decision makers

* = Pulls from GKI's new "Assessing Innovation Impact Potential Toolkit"

Enablers & Barriers Analysis

Enablers & Barriers Scoring Table

Health systems in LMICs

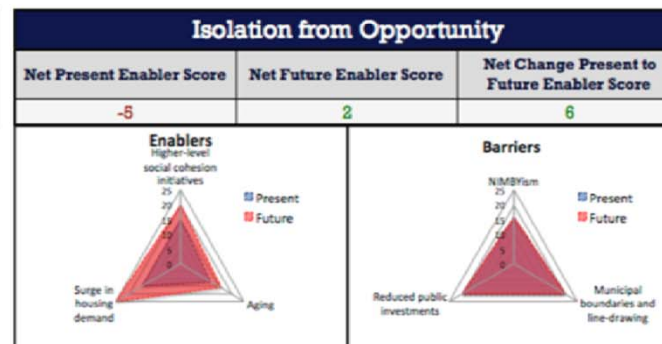

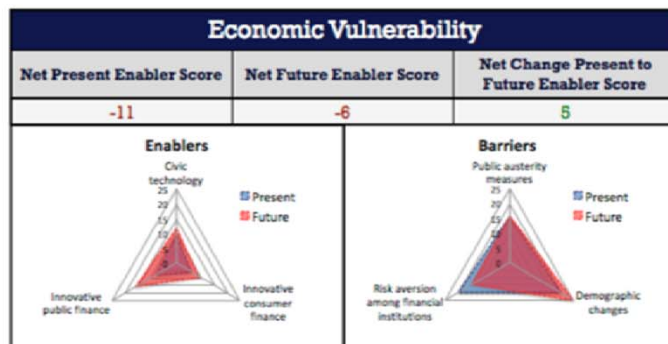

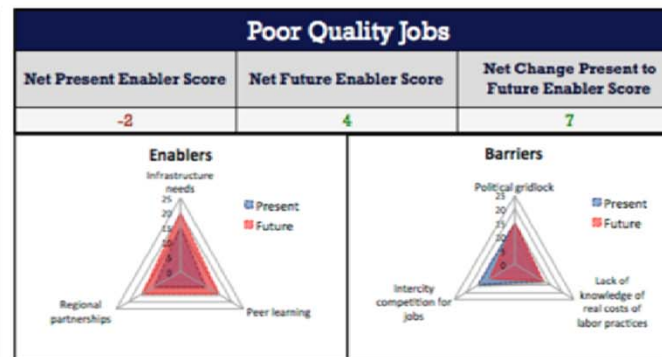

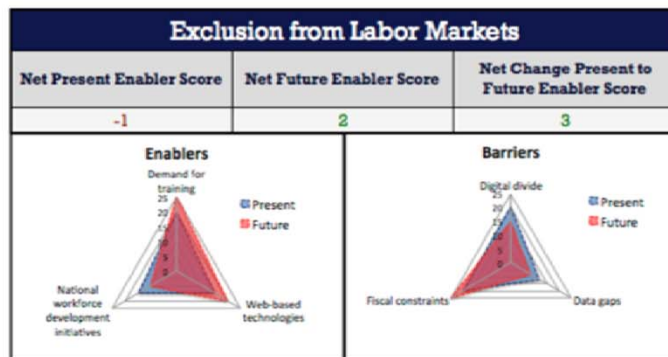

Low priority of emergency care on health agendas

Poor organization and coordination of care

Enablers & Barriers Scoring Table

Strategy Evaluation

Capturing Program Adaptation in Complex Environments

Evaluating Program Strategy in Complex Adaptive Contexts

To understand how goals were/weren't achieved, we must be aware of the final path(s) the program took, and why.

Did the program effectively adapt strategy to mitigate risk, leverage opportunities and address the changing context? ⁴⁰

Office of Monitoring
& Evaluation

Methodology: Stages, Goals, Needs and Tools

Baseline

Identify *Intended* Strategy

Common strategic frame of reference

Clear understanding of anticipated results

"M&E 101" Training

Facilitated discussions

Outcome mapping

Midline

Capture *Emergent* Strategy

Process for documenting implementation

Process for documenting context changes

Process journals

Outcome journals

Regular check-ins

Endline

Document *Realized* Strategy

Understanding of strategic factors

Program theory as implemented

Agreement on efficacy of strategy

Context timeline

Anticipated/realized results chain

Guided discussions with staff and partners

Office of Monitoring
& Evaluation

Approach:

- M&E capacity is a prerequisite for participatory approach
- Ambitious monitoring plans can lead to data dumps and data fatigue
- Knowledge of influential factors will never be complete
- External facilitator is very important, particularly at endline

Findings:

- Responsive strategies include avoiding risk *and* leveraging opportunity
- It is difficult to compare what is to what might have been
- Adaptation is not inherently “good” or “bad” - but it affects results

Thank you!

Elizabeth Ruedy
Director, Office of Monitoring and
Evaluation

Ex-Post Evaluations: Testing for Sustainability

Justin Fugle, Senior Advisor, Plan International USA

Successful Final Results...

... Do Not Guarantee Lasting Impact

Ex-Post Evaluations Should Become Standard Practice

- Baseline Survey
- Mid-term Review
- Final Evaluation
- Ex-Post Evaluation

Ex-Post Evaluations are similar to Finals in both costs and methods

Communities Mobilized and Heard

Local Leaders Respond and Support

Governments Adopt and Scale - Up
